

Omkar Patil

Linux | DevOps Engineer|AWS|CI/CD|Kubernetes

+91-9028609403 | omkarpatil9403@gmail.com|Latur,Maharashtra,India | Open to Relocation

PROFESSIONAL SUMMARY

Aspiring DevOps Engineer with practical project experience in designing and automating CI/CD pipelines, containerizing applications with Docker, and orchestrating workloads on Kubernetes. Skilled in deploying and managing cloud infrastructure on Amazon Web Services (AWS), including AWS EKS, EC2, IAM, and Elastic Load Balancer. Hands-on experience with Infrastructure as Code using Terraform and Ansible, and real-time monitoring using Prometheus and Grafana. Passionate about automating software delivery, improving system reliability, and building scalable cloud-native solutions.

TECHNICAL SKILLS

Cloud Platform:	Amazon Web Services (AWS) — EKS, EC2, IAM, Elastic Load Balancer, VPC, Subnet, S3
CI/CD Tools:	Jenkins (Pipeline-as-Code), Git, GitHub, DockerHub
Containerization:	Docker, DockerHub, Docker Image Build, Docker Compose
Container Orchestration:	Kubernetes (K8s), Pods, Deployments, Services, Helm Charts
Infrastructure as Code:	Terraform, Ansible
Monitoring & Observability:	Prometheus, Grafana, Metrics Dashboards, Alerting
Operating Systems:	Linux (Ubuntu, CentOS), Bash Scripting, Command Line
Version Control:	Git, GitHub
Build Tools:	Maven

PROJECTS

CI/CD Pipeline Automation —Snake Game Application

DevOps Personal Project | May 2026

- Designed a Jenkins Pipeline-as-Code CI/CD workflow to automate the build, test, and deployment lifecycle of an application, eliminating all manual deployment steps.
- Automated Docker image creation and pushed images to DockerHub on every GitHub commit, enabling consistent and version-controlled artifact delivery.
- Integrated GitHub repository with Jenkins for automated trigger-based pipeline execution, reducing time-to-deploy significantly.
- Deployed containerized application workloads on a Kubernetes cluster, managing Pods, Deployments, and Services for reliable application availability.
- Deployed the complete monitoring stack using Helm Charts; configured Prometheus and Grafana dashboards for real-time application performance tracking.
- Diagnosed and resolved real-world integration issues across Docker, Jenkins, and Kubernetes environments, improving overall pipeline stability.

Netflix Clone Application — DevOps Deployment on AWS EKS

DevOps Personal Project | May 2026

- Containerized a Netflix clone application using Docker and deployed it on Amazon AWS EKS (Elastic Kubernetes Service) for scalable, cloud-native hosting.
- Built an end-to-end Jenkins CI/CD pipeline integrated with GitHub for automated build and deployment workflows, triggered on every code push event.
- Pushed Docker images to DockerHub and deployed application workloads on AWS EKS, configuring Kubernetes Deployments and ClusterIP/LoadBalancer Services.
- Configured AWS Elastic Load Balancer to expose the application externally, enabling high-availability and scalable traffic routing for end users.
- Resolved complex AWS infrastructure issues including IAM role and policy configuration, Kubernetes networking, VPC subnet tagging, and LoadBalancer provisioning.
- Gained practical experience managing AWS cloud resources including EC2 instances, IAM roles, EKS node groups, and VPC networking components.

EDUCATION

Bachelor of Science (B.Sc.) — Computer Science and Technology

Swami Ramanand Teerth Marathwada University (SRTMU), Maharashtra | 2023 – 2026

Class XII — Science Stream (Maharashtra State Board)

Maharashtra, India | 2021

Aggregate Score: 91.6% | Distinction: Department Topper

ClassX(MaharashtraState Board)

Maharashtra, India | 2019

Aggregate Score: 76.8%

KEY ACHIEVEMENTS

- Scored 91.6% in Class XII and ranked as Department Topper, demonstrating strong academic performance and technical aptitude.
- Successfully deployed two production-grade DevOps projects on AWS cloud from scratch — covering infrastructure setup, CI/CD automation, containerization, and monitoring.
- Achieved hands-on proficiency across the full DevOps toolchain: Git, Jenkins, Docker, Kubernetes, AWS, Terraform, Ansible, Prometheus, and Grafana.

CORE COMPETENCIES

CI/CD Pipeline Design | Cloud Infrastructure (AWS) | Container Orchestration (Kubernetes) | Infrastructure as Code | System Monitoring & Alerting | Linux Administration | Agile Mindset | Problem Solving | Version Control (Git)
